Art Unit: 1743

DETAILED ACTION

This Office Action is in response to Applicants' response filed October 5, 2002 and entered as Paper No. 3. Claims 1-12 are pending.

Withdrawal of Rejections from Previous Office Action

- All rejections in the previous Office Action are withdrawn in view of Applicants' arguments that Miller teaches a three-layered composite, whereas the instant application claims a liquid composition.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese publication 10-251517 to Akamatsu et al.

Akamatsu at al teach a vibration damping composition comprising 100 pts.wt. viscous liquid and 5-200 pts.wt. solid powder. The viscous liquid is preferably silicone oil, as recited in claim 2. The oil has a viscosity of 100-1,000,000 centistokes (100-1,000,000 mm2/s), as recited in claim 3. The solid powder has an average diameter size of 0.1-100 microns, as recited in claims 5 and 6. The particles are also of differing diameters – 1 wt.% or less of the powder has a diameter size of less than 10 microns and 10 wt.% or more of the powder has a diameter size of greater than 30 microns. The particle sizes differ by at least 20 microns, as recited in claims

Application/Control Number: 09/846,834

Art Unit: 1743

4 and 7. The powders may be inorganic powers, calcium carbonate powders or organic resin powders, as recited in claims 8-10. With respect to claim 12, Akamatsu et al teach that the composition may be incorporated with other components, such as clay. It is noted that the reference does not specifically state that the composition is in the form of a liquid, however, since the composition contains the same components, which are present in the same amounts as claimed by Applicants, the composition would inherently have the same form as Applicants, absent evidence to the contrary.

Therefore, for the reasons set forth above, Applicants' claimed invention is deemed to be anticipated, within the meaning of 35 USC 102(b) in view of the teachings of Akamatsu et al.

Response to Arguments

- 3. Applicant's arguments with respect to claims 1-12 have been considered but are moot in view of the new ground(s) of rejection.
- 4. Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on October 15, 2002 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609(B)(2)(i). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory

Application/Control Number: 09/846,834

Art Unit: 1743

period will expire on the date the advisory action is mailed, and any extension fee pursuant to

37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the mailing

date of this final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to LaToya I. Cross whose telephone number is 703-305-7360.

The examiner can normally be reached on Monday-Friday 8:30 a.m. - 5:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Jill A. Warden can be reached on 703-308-4037. The fax phone numbers for the

organization where this application or proceeding is assigned are 703-872-9310 for regular

communications and 703-872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
